

Parlor Watch 305

It's like having an extra manager in the barn!

Watch the herd's milk production!

- See pounds of milk per cow by pen for each milking
- Deviations from rolling average for each pen, each milking
- See bulk tank totals and have the ability for overflow alarms.

Watch the milker's performance!

- See the start, stop, and total time for each pen & work shift.
- Number of cows per hour.
- Pounds of milk per hour
- Time interval (gap) between pens.
- Shows the milk temperature after the pre-cooler by pen and shift.

Watch the milking wash up performance!

- Minimum and Maximum temperatures for each cycle during wash up.
- Wash duration and water volume is recorded for each wash cycle.
- Identify faulty valves before they fail.

Easy for the milkers to use!

- Milkers have only one button to push between pens
- Bright L.E.D. display, mounted in the parlor will show the milkers which pen they are on.

Manager friendly!

- Automatically update pen counts from DairyComp 305.
- Capable of automatically printing an easy-to-read report after each milking.
- Print full-color graphs.
